Fabric Specification Sheet

Sambre Boucle - Latte

£180 per metre

George Smith Sambre boucle introduces a refined yet relaxed character to interiors and is available in 10 versatile colourways. Sambre is a laundered boucle giving it a softer, more lived-in feel with a wonderfully supple hand. This post-weave finish enhances the boucle's natural tactility. The result is a texture that catches the light with quiet definition, making it especially suited to rounded, sculptural silhouettes such as our Elio collection. Sambre is thoughtfully crafted from a blend of linen and wool, chosen for both performance and beauty. The linen is sourced from Belgium, the world's most renowned region for flax production, lending exceptional strength, durability, and natural lustre. These fibres ensure that upholstered pieces maintain their comfort and visual appeal for years to come, becoming as enduringly timeless as the day they were made. With a Martindale rub count of 30,000, Sambre offers excellent durability for everyday use in residential settings, particularly within family homes.
